RE: **Tank Farm Four, Portsmouth (LS 2712)**
Site Investigation Report
Tanks 38, 42, 45, & 48

Dear Capt. Wyman:

The Division of Site Remediation has reviewed the Site Investigation Reports for the above referenced tanks. Based on the release and site specifics, current extent and severity of the contaminant plumes, as well as other information represented in the report, the Division concurs with the recommendations for Tanks 38, 42, 45, & 48. The closure assessment reports following the tank closures should include a section which details the interim action taken and reassesses the need for remediation at each tank.

Although the Division has already received the project schedule for closure of the tanks at Tank Farm Four, an additional project schedule detailing the time frame for the implementation the corrective action plan must still be submitted.

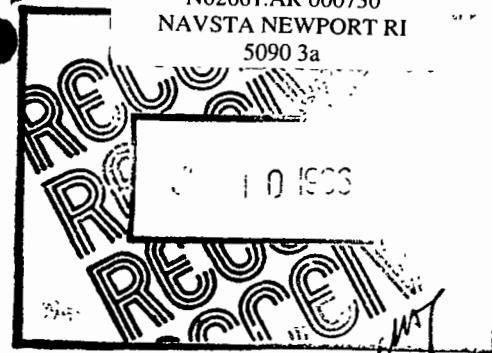

If you have any questions or require additional information, please contact Patrick Hogan at (401) 277-4700 ext. 7119.

Sincerely,

Bruce T. Catterall
